PROJECT PROPOSAL

Smart Health in a Smart City

Presented by Risk Takers

Introduction & Team

Team members

Robin de Ryck

Duncan Rombaut

Joris Xu

Wesley Starreveld

Nitesh Giri

Roshan de Alwis

Ángel Madrid Morales

Context & Problems

Context:

Help for Paramedic Companies on festivals.

The Problem:

Slow Response Time
Lack of Immediate Care And Awareness

Customer Segment

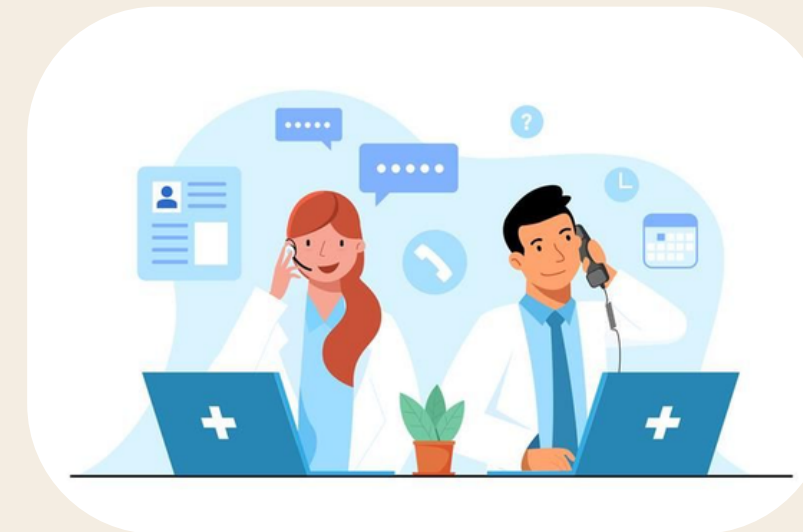

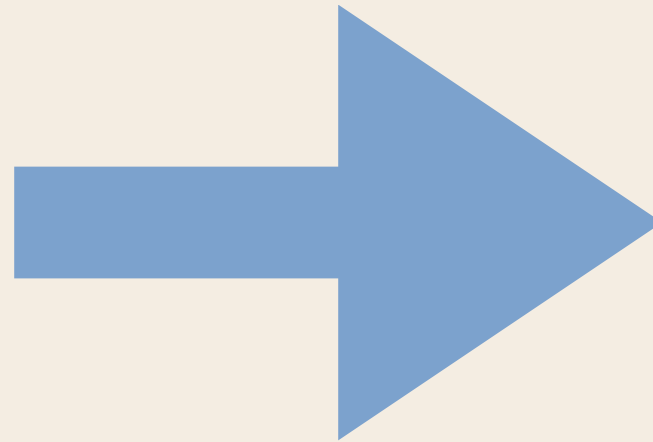

Solution

Value Proposition

Rapid Deployment

First aid Support

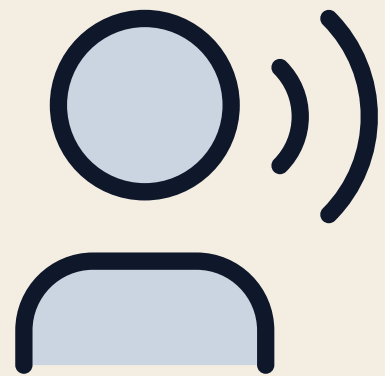

AI Route Analysis

System Description

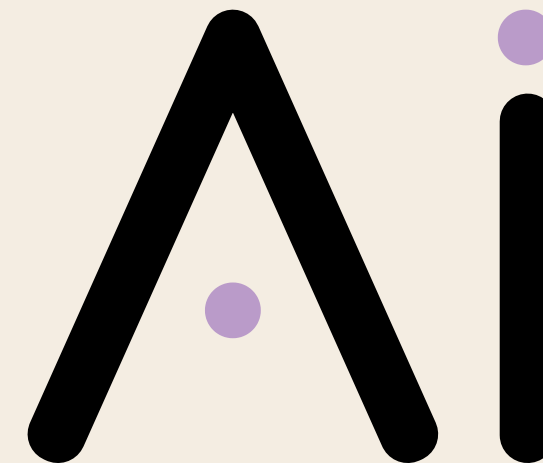

Hardware Components

High-speed drones
High and low-Res Camera
Communication System

Software Architecture

AI Navigation
Interface

Risks

A. Device malfunction

Hardware/software
Impact
Maintenance and backup

5	10	15	20	25
4	8	12	16	20
3	6	9	12	15
2	4	6	8	10
1	2	3	4	5

C. Hacking

Loss of control
Encryption and MFA
RTH procedure

B. Extreme weather

Influence performance
Weather resistant
Avoid risk

Process Flowchart

Flowchart

Drone Simulation (PoC)

Airsim

Python

Audio & image capturing

Each incident

Safe space

```
client = airsim.MultirotorClient()
client.confirmConnection()
drone_name = "FestivalDrone"
reports= getReports(client, drone_name)
for report in reports:
    client.enableApiControl(True, drone_name)
    client.armDisarm(True, drone_name)

    print("\n=== INCIDENT DISPATCH SYSTEM ===")
    report = random.choice(getReports(client, drone_name))

    drone_report = report
    drone_report.run()
    print(f"Created report: {drone_report}")
drone_report.gohome();

print("Mission completed successfully.")
```

Drone Simulation

Realtime Data from the Drone

Drone Generates Details

Site 1

```
Created report: Report: Crash at Intersection
Severity: Low
Location: Intersection of 5th and Main St.
Time: 2026-02-12 14:35
Description: A minor car accident has occurred; the pedestrian's
condition is stable and not life-threatening.
Fatal: No
```

Site 2

```
Created report: Report: Overturned Vehicle
Severity: High
Location: Near City Park, 3rd Ave.
Time: 2026-02-12 15:50
Description: A major truck accident has occurred; the victim is i
n a critical condition. Guidance is provided to a bystander until
paramedics arrive.
Fatal: Yes
```

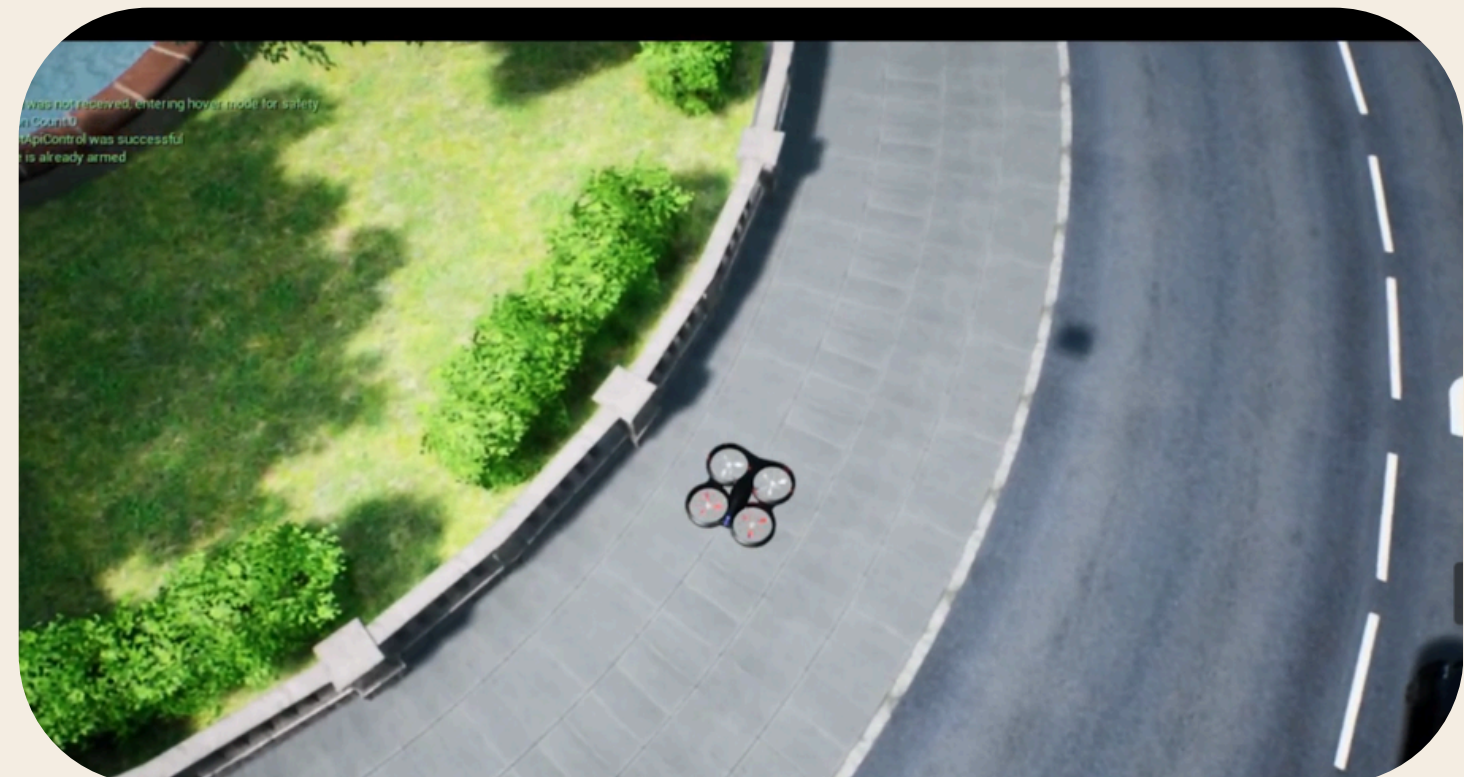

Report

```
==== INCIDENT DISPATCH SYSTEM ====
Taking off...
Ascending to 50 meters...
Starting smart navigation...
```

```
Returning to base...
Starting smart navigation...
```

```
Reached destination.
Navigation complete.
Descending...
Landing...
Mission completed successfully.
```
